Xin Qian

101300705@seu.edu.cn

Objective

A theoretical physicist with interest in integrable modes, both in high energy physics and condensed matter physics

Education

Niels Bohr Institute, University of Copenhagen, Theoretical physics — Aug 2022 – Aug 2025

- **Ph.D.** with thesis "Supersymmetric Chern-Simons theory and its application to ABJM theory",
- **Supervisor**: Charlotte Fløe Kristjansen **Email**: kristjansen@nbi.ku.dk

Niels Bohr Institute, University of Copenhagen, MSc in quantum physics — Sept 2020 – Jun 2022

- Thesis: One-point functions in AdS/dCFT – Matrix product states and twisted Yangian algebra, supervis
- **Advisor**: Charlotte Fløe Kristjansen **Email**: kristjansen@nbi.ku.dk

School of Physical Science and Technology, Lanzhou University, BSc in physics — Sept 2015 – Jun 2019

- Thesis: Lagrangian of field theory from symmetry
- **Advisor**: Zhanwei liu **Email**: liuzhanwei@lzu.edu.cn

Work experience

Shing-Tung Yau Center and School of Physics, Southeast University, Postdoc — Jan 2026 –

- **Advisor**: Yunfeng Jiang **Email**: jinagyf2008@seu.edu.cn

Publications

[1] T. Gombor, C. Kristjansen, V. Moustakis, and $\mathbf{X.Qian}$, On exact overlaps of integrable matrix product states: inhomogeneities, twists and dressing formulas, 2410.23117.

Academic Activities

Young Researchers Integrability School and Workshop	Nordita, Stockholm 2022
Integrability in Gauge and String Theory	ETH, Zürich 2023, Jun.
Integrability, Dualities and Deformations	Nordita, Stockholm 2025. Sept.
International Workshop on "Challenges in Integrability"	APM, Wuhan 2025. Nov.

Teaching

TA in course Gauge gravity duality — 2023

Skills

Computational Languages: C, Python, Fortran, Mathematica, Matlab

Awards

- Excellent Graduates Award: 12, 2018
- Danish Governmental Scholarship 09, 2021

Selected course work

- Advanced Quantum Mechanics
- Quantum field theory I
- Condensed matter theory I
- Condensed matter theory II
- Advanced Condensed Matter Theory
- Gauge gravity duality
